Dade. 1608.

A Prognostication,
in which you may be-
hold the state of this
yeare of our Lord
God. 1608.

Being Leape yeere.

Made and set foorth by *Iohn*
Dade Gentleman, practi-
tioner in Physicke.

LONDON,
Imprinted for the Company
of Stationers, 1608.

A Description of the

Foure Quarters of the yeare:

And first of Winter

Quarter.

○. in *W. m. x.*

THE Winter Quarter
 (after the opinion of the
 Astronomers) began *h*
xiii. day of December
 1607. beeing Sunday,
 and continueth vntill the
xi. day of March; So
 that alwayes the first
 part of the Astronomi-
 call Winter is in one politique yeare, and the
 latter ende thereof in the other: At which time,
 was the shortest day of the yeare, by reason of the
 Sunnes greatest declination from the Equi-
 noctiall Line. This Quarter naturally is cold

A Prognostication.

and mayst, and will (as I suppose) very forcibly,
with plentie of Raine, blustering Windes, and
Stormes, shew his kinde; engendring many
griuous sicknesses, as Conuulsions, Cramps,
Stitches, Ache, and sozenesse in the Bones,
Sciatica, Goutte, Swellings, and Knobbes in
the Ioynts: also, Rheumes and Cattarres fal-
ling out of the Head into the Teeth, Throate,
and Lungen; causing sodaine daunger and suf-
focation to the diseased hereby.

Of the second Quarter of the
yeare, called the Spring.

○ in V. 8. II.

THE Sunne hauing fully finished the
Winter Quarter with the last part of
Pisces, beginneth the Spring (beeing the
second part of this yeare) the xi. day of
March, then entring into the first Minute of
Aries, the Equinoctiall signe, and maketh the
day and night of one equall length. This Quar-
ter

Dated 1608.

ter is of all the rest, the most pleasantest and most temperate. And considering the speciall inclination thereof for this present yeare, I iudge it to prooue very kindly with indifferent moysture, and much closenesse of ayre, & somewhat windy.

This season is like to prooue very sicklie, and many shall die of Diseases comming of corrupt and euill distemperature of Blood; and the best constitutions (as the Sanguine) most subiect to the danger thereof. Also these Diseases are then most like to follow, namely the Squinzie, Fluxes of blood, Coughes, Scabs, Itchinges, the small Pore and Measels, Feuers of diuers kinds, Dulnesse in Hearing, and many other strange euils.

Of

B 3

A Prognostication.

Of the third Quarter of the yeare,
called the Sommer.

☉ in ♋. ♏. ♎.

Sommer, the third part of the yeare Astronomicall, taketh his beginning at the Sunnes ingresse into the beginning of Cancer, (at which time, hee maketh his greatest declination towardes the North, from the Equinoctiall, and causeth the longest day and shortest night in the yeare :) And so Sommer holdeth on (after the Astronomers accompt) untill the xij. day of September following. As concerning the state of the weather in this season by Astronomicall circumstances, I gather, that it will greatly varie from the peculiar inclination of thisnesse, and bee very unkinde with more plentie of Raine, and stoute Windes, then would bee fitting the season. As for Infirmities and bodily Griefes, such as are fittest to invade and afflict many this season, bee
con.

Dade. 1608.

continually burning Agues, Plurisies, Frenses,
hotte Apostumes, diuers paynes in the Head,
noysome Sweatinges, many strange and new
Infirmities wherewith many shall be vexed, and
not a few utterly bereft of their liues sodainely
this Quarter by vntimely deathes.

Of the fourth Quarter of the
yeare, called *Autumne*.

☉. in ♌. m. 7.

The Haruest Quarte, or fall of the Lease,
beginneth euermore at the time of the
Sunnes departure from the last scruple
of the xxx. degree of Virgo, into the first
minute of the second æquinoctiall signe Libra,
which is on Tuesday the xiiij. day of Septem-
ber; and shall last vntill 5 xiiij. day of December,
when the Sunne shall enter into Capricorne.

B 4.

Now

A Prognostication.

Now touching the inclination of the Weather, and generall state of the Ayre: I gather that this season (for the most part) will fall out reasonable kinde and naturall, not varying much from his owne naturall disposition.

The Diseases and Sickneses like to molest the people most this Quarter, are such as come of aboundance of cold, and much moysture: as paynes in the Head, Rheumes, Coughes, Feuers, running Eyes, Dropsies, Ache in the Feete, watry Laskes, and such like, both dangerous and deadly.

A briebe

Dade: 1608.

A brieft Nore how the seauen Planets
are placed aboue the earth, for euery Moneth
after Sunne setting, by which you may per-
ceiue how they keepe their motion, night, and
day, all the yeare. Moreouer, the good dayes
of Sympathie, touching mans complection,
and body in causes of administration of Phi-
sicke, or such like. And also, the Euill dayes,
according to the maleuolent aspects; in which
it is dangerous to let Blood, to take Vomits,
Purgations, Sweates, or such like attempts.

Of Ianuarie.

{	h. and ♀ goe downe before the Sunne.	}
{	♃. is about mid Heauen after Sunne setting.	}
{	♄. is vnder the Earth at Sunne setting.	}
{	♀. is to be seene towards the East in the morning be- fore Sunne rising, very beautifull.	}

The first and second dayes, sharpe winterly weather.

The iii. day some change.

The iiii. v. and vi. dayes; some store of snowe, or other
moysture.

New Moone on Thursday the vii. day. x. minutes before two
a clocke

A Prognostication.

Eclipse

A Prognostication.

The Eclipse of the Sunne the xxxi. day of July xxxvi. min.
before iij. of the clocke in the after noone, when he will be
darkened two poyntes and one scruple: and from the be-
gining to the end thereof, is one hower and xxxix. scruples:
whose effect will begin to take place the xxx. day of November
next, and continue untill the xxxiii. day of July 1610.

Now being the signification wherof, it doth (in my opinion)
portend

Dade. 16 08.

portentous demonstrations to divers sortes of men in their Substaunce,
and be-ritment to the Seedes of the Earth.

It also forthwith great hinderance to Come by Cater-
pillers, Fleumes, and such like: Many fierie Weiders, and
burning Lampes shall appeare in the ayre: Many huge and
strong Windes, and some unexpected Floodes, with other gre-
uous quentes: From the which the Lord defend vs.
